BILINGUISTICS

Here is a sample data chart that was used with this client. The charts have been divided into tasks that the client should be able to perform despite VPI that will increase intelligibility and tasks that will assist articulatory placement after the surgery has taken place.

Vowel Production

Date												
a												
e												
i												
o												
u												
u-i i-u												
a-o o-a												

Consonant Production

Date												
m												
n												
ñ (nya)												
h
